Let's look at R Markdown files *.rmd & how we can easily generate a HTML file for our results

Notes: Setting up my R environment by loading 'ggplot' & 'palmerpenguins' packages

```
library(ggplot2)
library(palmerpenguins)
```

Notes: Producing Visualization

```
ggplot(data = penguins) +
  geom_point(mapping = aes(x = flipper_length_mm, y = body_mass_g, color=species))
```

Warning: Removed 2 rows containing missing values (geom_point).
